IMPORTANT: For further information regarding specific model information and SmartBar compatibility, please refer to the respective vehicle's Specification Sheet. This document is to be used as a guide for fitted weight only.

Please note the term 'fitted weight' refers to the nett effect on Gross Vehicle Mass the SmartBar has once it is fitted (i.e. the sum of the weight SmartBar and supporting brackets, less the weight of any of the original components removed from the vehicle during installation. The bumper skin for example).
