Ford Ranger & Everest
Under Vehicle Armour

Application:

Next-Generation Ford Ranger & Ford Everest MY22
(All variants except Raptor)

Fitting Time:

1 Hr

Fitted Weight:

19.5kg

Available:

Now

Freight Information:

UP009BL009

1230 L x 1150 W x 160mm H & 31kg

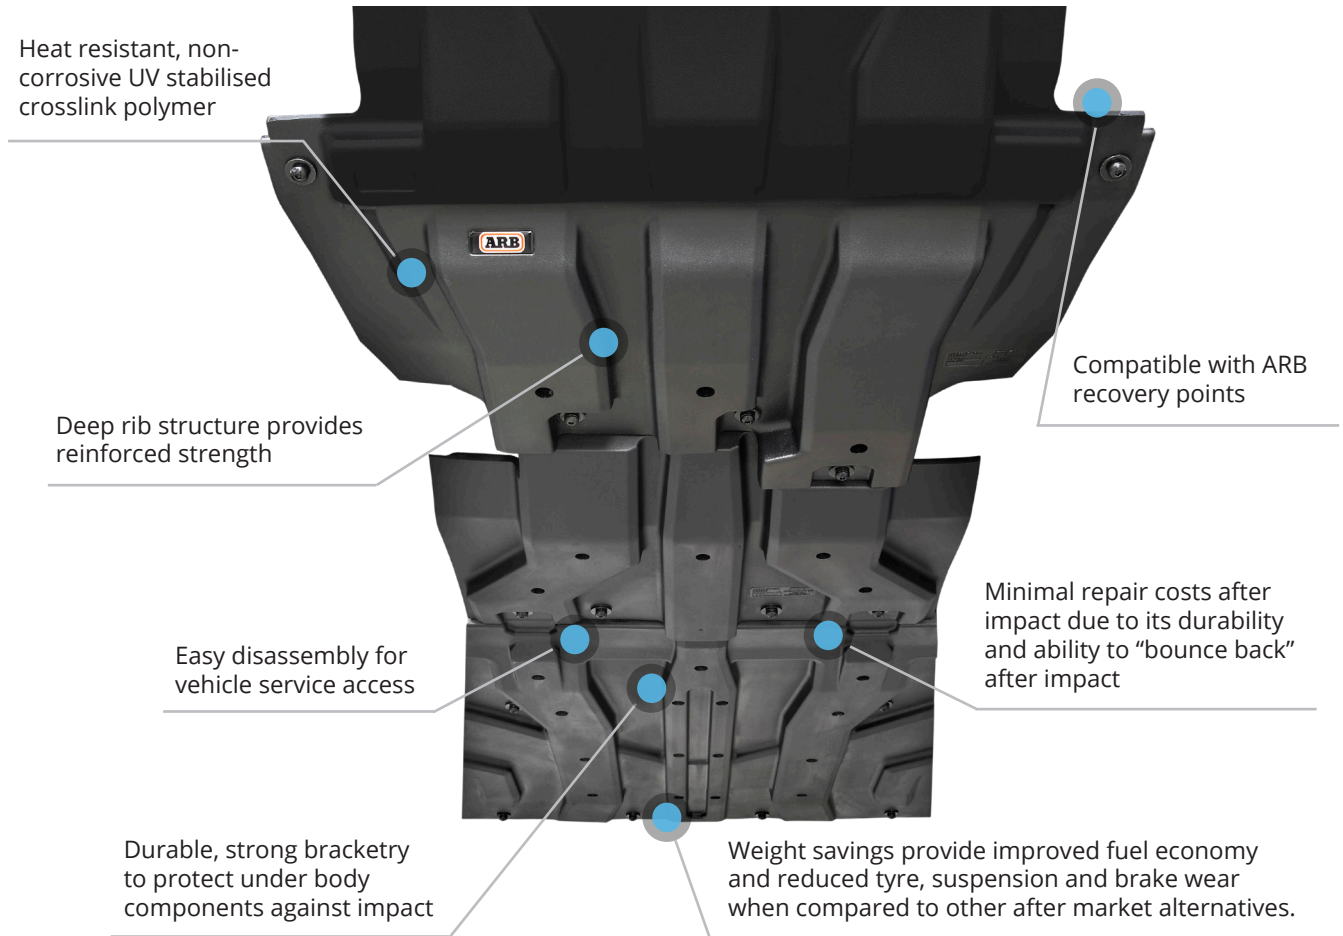

**PROUDLY
AUSTRALIAN MADE**

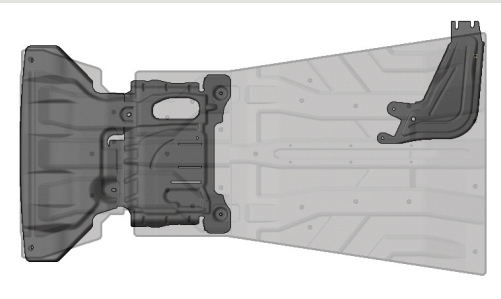

Designed as a complete OE skid pan replacement for the Next-Gen Ranger and Everest, Under Vehicle Armour (UVA) offers superior coverage and levels of protection for the underbody of your vehicle. Constructed from a UV stabilised crosslink polymer and designed with a 10mm thick, unique, deep rib structure, it provides continuous strength and protection for your vital components.

Utilising roto-moulding manufacturing technologies enables UVA to be uniquely shaped and sized, designed specifically for each vehicle, providing significant surface coverage to the underbody of the Ranger/ Everest. Constructed using crosslink polymer not only provides robust properties, protecting your underbody from rocks, stumps, ruts and other hazards whilst keeping your GVM and repair costs low. It also allows the UVA to absorb impact, reducing shock to the vehicle and can re-form to its original shape after an incident.

Easy to fit and with serviceability in mind, the UVA is manufactured as three individual pieces allowing individual removal when servicing different components of your vehicle. The polymer's inherent properties are resistant heat, corrosion and rust, providing the ultimate solution for protecting those vital components on the underbody of your Ford Range or Everest.

Product Features

	Feature	Description	Included	Optional	Part Number
	Compatible with ARB Recovery Points	Compatible with either one or two ARB Recovery Points.	-	-	-
	Easy Installation	The Next-Gen UVA completely replaces the OE skin pad.	-	-	-
	Uncomplicated Servicing	Made up of three individual parts, the UVA is designed for serviceability. Each piece has been designed so that it can be removed and easily allow access to different parts of the vehicle.	-	-	-
	Increased Protection	The SmartBar UVA provides an increased coverage of the under-body of the vehicle compared to alternative products, resulting in superior protection to vehicle components. <i>Original OE Skid Pan = Dark</i> <i>SmartBar UVA = Light Grey</i>	-	-	-
