**Radar-**

Radar/Camera + Radar Kit 200mm L x 180mm W x 120mm H & 1kg

**PROUDLY  
AUSTRALIAN MADE**

A lighter, streamline bull bar, made to protect your Next-Gen Ford Everest. Designed, engineered and manufactured in Australia, the StealthBar was developed in a strategic collaboration with Ford. Resulting in a tough, low profile bar, that seamlessly fits the Everest's aesthetics.

Designed with a unique hollow construction and built from a tough, corrosion and rust resistant UV stabilised polymer, StealthBars provide superior frontal protection for your vehicle with the ability to absorb on impact and then return to shape in the case of an incident. Thanks to their lightweight properties, StealthBars assist with minimising the vehicle GVM, improving fuel economy and reducing tyre and brake wear compared to alternative bullbars.

Accommodating the fitment of a range of aftermarket safety and 4X4 accessories, the StealthBar is available in winch and non-winch variants all compatible with the Ford Advanced Driver Assistance Systems (ADAS). The StealthBar is a streamline platform, perfect for mounting your 4x4 accessories and offering a tough, lightweight solution for protecting your vehicle.

- Bar available in black as standard. (Other colours available for larger order quantities.)

# Safety Features

SmartBar puts safety at the forefront. Going above and beyond the Australian Safety Standards, to ensure the safety of the vehicle, occupants and pedestrians. StealthBars go through exhaustive testing, which proves the superiority of our impact resistant technology allowing us to confidently stand behind the quality and safety of our bull bars.

## Chassis Mounts:

The chassis mount design comprises of a bracket construction which allows for three axis of adjustability, to achieve a solid and perfect fit every time.

All brackets have been tested and comply with Vehicle Air Bag, and Australian Safety Standards.

## Pedestrian Safety:

SmartBar's have been tested to Australia's Pedestrian Safety ratings and proven to be less likely to cause serious injury to pedestrians than other alternatives. This is due to the hollow construction which allows the bar to absorb most of the impact along with the unique and specifically designed co-polymer material.

## Integrated Sensors:

The StealthBar is compatible with all Ford Advanced Driver Assistance Systems (ADAS). All StealthBars come with an integrated Radar & Camera\* housing. Safety features include but not limited to -

- Intelligent Adaptive Cruise Control (iACC)
- Lane Keeping System
- Driver Alert Systems
- 360-Degree Camera
- Autonomous Emergency Braking

*\*Camera only applies to variants with a front camera. Refer to matrix on final page for more information.*

**Impact absorbing hollow construction means increased safety, and minimal repair costs after impact.**

Manufactured from environmentally friendly, recyclable polyethylene polymer. UV stabilised polymer for durability and corrosion resistance and therefore minimal maintenance.

Lightweight design provides weight savings which improve fuel economy and reduce tyre, suspension and brake wear when compared to other alternatives.

# Product Features

	Feature	Description	Included	Optional	Part Number
	<b>Parking Sensors</b>	The StealthBar is compatible with parking sensor variants of the Next-Gen Ford Everest.	✓		
	<b>Underbody Panels</b>	Underbody panels including side wings and under centre cover, have been designed to provide additional protection to the underside of the vehicle.	✓
